

## **FELPHAM COMMUNITY COLLEGE**

Felpham Community College is a specialist Mathematics and Computing College with 1350 students aged between 11 and 18 and a total teaching staff of 88 teachers.

The school serves an area from East Bognor to Elmer and has a diverse catchment which places it 10<sup>th</sup> on the list of multiple deprivation in West Sussex.

Our students enter the college with broadly average ability although 25% of them have learning difficulties or disabilities.

The college has set itself the goal of putting learning and teaching at the heart of everything it does and making genuine inclusion a reality.

Ofsted describes the senior management and leadership as strong and maintains that the college has good capacity to improve. Our current agenda for improvement includes initiatives to raise the performance of boys and reduce to zero the number of lessons rated as satisfactory or below.
